Near Daejeon

View of the conference center from the hotel

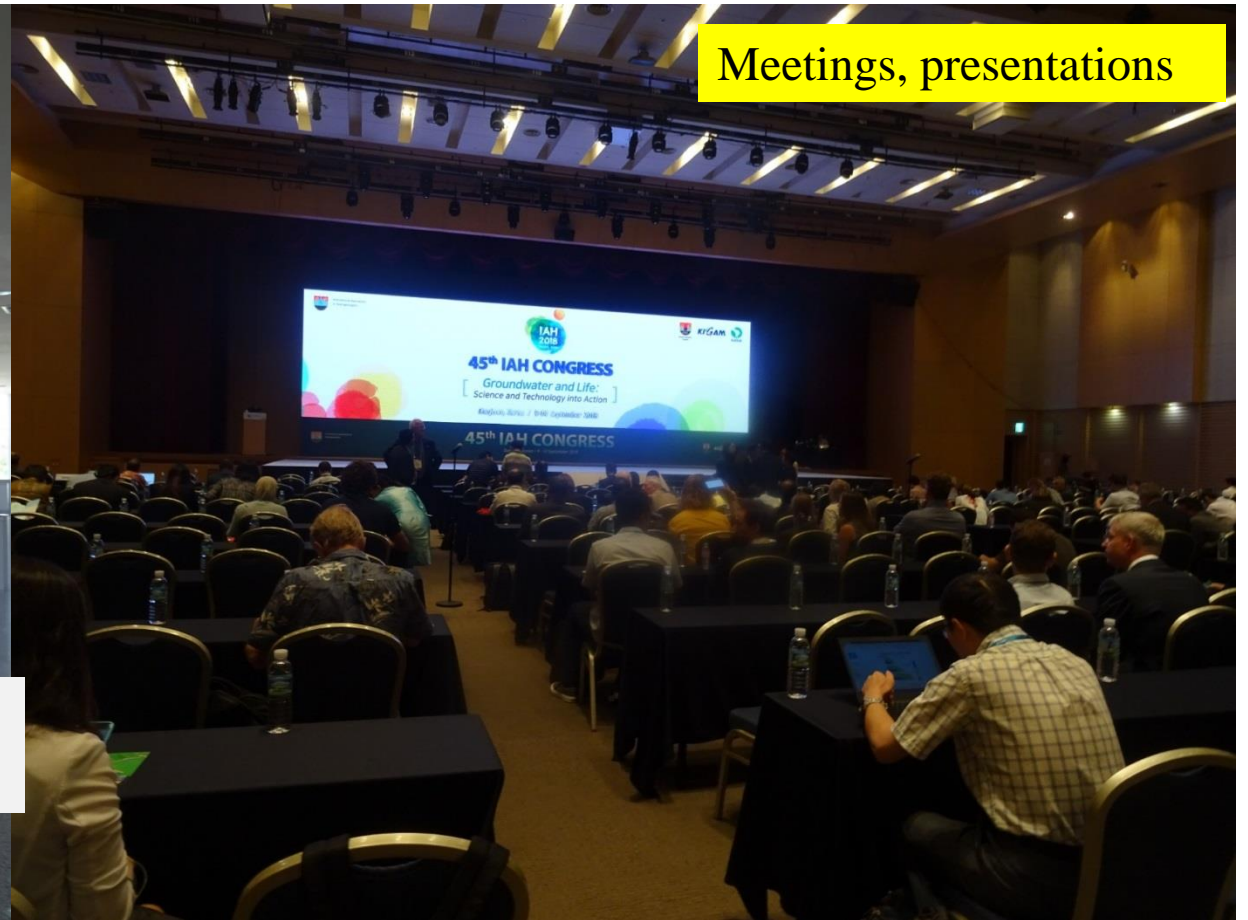

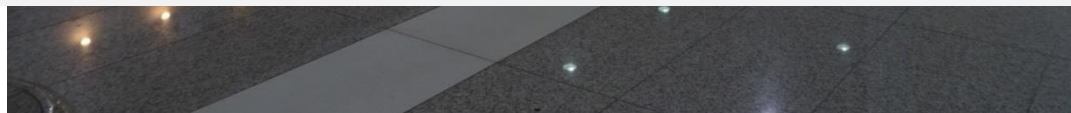

The congress venue of IAH 2018, Daejeon Convention Center (DCC) is an international level convention center located in Daejeon, the science city of Korea, providing user-friendly and world-class facilities with 24 meeting rooms of different sizes and a grand ballroom that can accommodate up to 1,000 people.

Registration

About 600 participants of the Congress, mostly participants from Asia (+ 6 people from Poland).

Meetings, presentations

Trips – 9 trip suggestions

Trip 2. World's longest 33.9 km sea dike and historic temple (I took part)

Saemangeum is an estuarine tidal flat on the coast of the Yellow Sea in Korea. It was established with the dam construction, called 'Saemangeum Seawall Project' carried out by Korean government. The project was completed in April 27, 2010, and is scheduled to be converted into either agricultural or industrial land. Saemangeum sea dike is the world's longest of 33.9 km connecting Gunsan and Buan on the west coast of Korea. Naesosa Temple was built in 633 AD during the Baekje Dynasty and was rebuilt in 1633 during the Joseon Dynasty.

My comments: good organization of trips, interesting places, full information about the places, combination of elements related to hydrogeology and historical places.

Trip 2. World's longest 33.9 km sea dike and historic temple

My comments: very good organization, departure from the Congress Center, arrival at the scheduled time.

World's longest 33.9 km sea dike

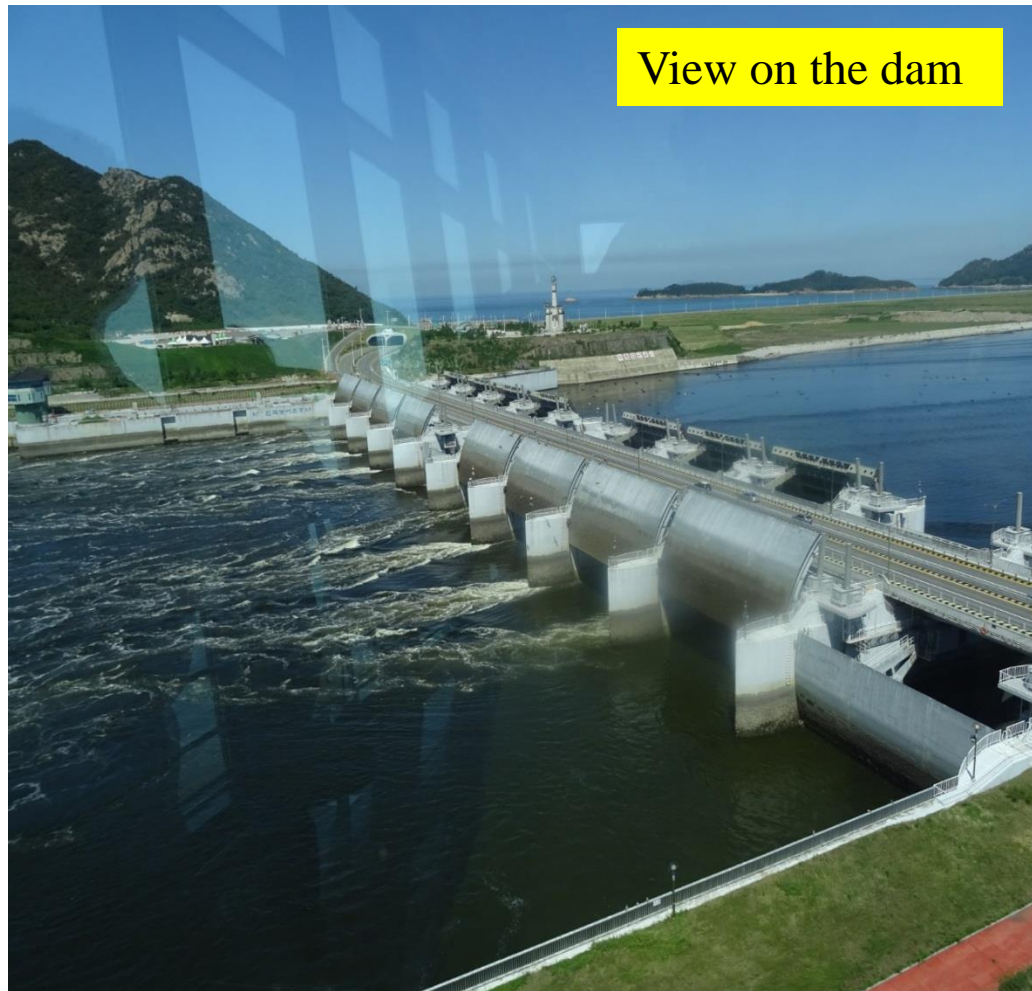

In the "management center" of the investment

Trip 2. World's longest 33.9 km sea dike and historic temple

My comments: very good organization, departure from the Congress Center, arrival at the scheduled time.
